Actuarial Science, Mathematical Statistics, and Applied Statistics, Graduated June 2016

Employment History

Bank of China New York Branch

INTERN, MARKET RISK DEPARTMENT, September 2017 – Present

- Reviewed EPS Liquidity Stress Testing (LST) model production process including scenarios and assumptions and provided effective challenge to the FLUs. Validated LST model output and measured model performance by mapping LST production to 5G benchmark base on LCR rule.
- Reviewed FR2052a data attributes and validated FR2052a production process including Liquidity Coverage Ratio (LCR) calculations. Established comprehensive 5G FR2052a and LST dashboard to enhance the bank's liquidity risk management.
- Monitored and re-calibrated the bank's liquidity risk metrics and limits in compliance with risk tolerance and appetite defined in the Risk Governance Framework.
- Performed ongoing analysis on bank's liquidity portfolio to measure operational deposit, counterparty funding concentration and collateral haircuts, analyze liquidity impact by product, identify significant cash flow mismatch, forecast potential liquidity needs, and ensure liquidity buffer and contingency funding source adequacy.
- Other project participated: Enterprise Risk Assessment, Cash Flow Projection, Contingency Funding Plan, Recovery and Resolution Plan etc.

China Citic Bank Beijing Branch

INTERN, CORPORATE BANKING DEPARTMENT, June 2016 – August 2016

- Met with corporate customers and discussed their financial requirements, and provided appropriate financial advice.
- Assisted commercial loan manager and credit risk manager to examine enterprise's operation condition and drafted Enterprise Credit Risk Assessment.
- Analyzed corporate's annual report, project feasibility report and monitored client compliance, ensured client files are complete and up to date.
- Conducted extensive quantitative economic, industry and company research and analysis.
